NIWE ERP

Role quick-start cards

One page for each role

Version 1.38.0

Cashier

Sell, take payment, count the till.

Start of shift

- Your supervisor opens the session on your register with the opening float (POS > Registers & Terminal > Open session).
- Press **Go to terminal** and type your **PIN**.

Selling

- Scan the barcode or tap a product tile. Search by name or SKU if needed.
- Choose or add the **customer** if needed (credit, loyalty points).
- Press **Payment**, pick the method (split across several if needed), complete the sale.
- A discount over your limit, a void or a hand-changed price needs a **manager's PIN**.

Returns and mistakes

- **Receipts** shows this shift's sales with **View / Reprint** (reprints are marked COPY).
- A return: **Process a return**, type the invoice number, choose items, refund method and reason.

Cash

- Press **Cash** for paid-in, paid-out and safe drops. Drop cash into the safe when the drawer is heavy.
- **X report** any time; it changes nothing.

End of shift

- Record paid-in, paid-out and drops first. Open the close screen, **count the drawer** by notes and coins, explain any difference, **Close session**, print the **Z report**.

If the connection drops

- Keep selling: sales are queued and sync by themselves. Do not clear the browser or close it while the offline queue has sales.

> **Need more?** See the matching chapter of the User Manual, or ask your administrator.

Shift supervisor and manager

Open and close tills, approve exceptions, watch for loss.

Open and close

- **POS > Registers & Terminal > Open session**: assign the cashier, enter the float.
- **POS > Shifts**: see every shift with variance; **Force close** or **Close all sessions** if someone left without closing.

Approvals at the till

- Type your **PIN** on the cashier's screen to approve a large discount, a void, an old return, a changed price or a big paid-out. Your name is recorded as the approver.

Daily review

- **POS > Voids & returns**: every void, return, discount, price change and reprint, with who approved.
- **POS > Cash movements** and each shift's variance.
- Reports: **POS Exceptions**, **POS Shift Comparison**, **POS Sales by Cashier**.

Restaurant managers

- **End of day**: settle open orders, count the drawer, close the day (Z report).
- **Voids & comps** log; **Wastage** confirmations.

Remember

- You see the dashboard's **Needs your attention** list: act on overdue items, low stock and pending approvals.

> **Need more?** See the matching chapter of the User Manual, or ask your administrator.

Sales clerk

Quote, order, invoice and get paid.

The path

- **Quotation** (offer) then **Sale order** (agreed) then **Fulfil** (deliver) then **Invoice** then **Record payment**. You can start at any step.

Quotation or order

- Sales > Quotations or Sale orders > **New**. Choose the customer (or **+ New customer**), add products by name, SKU or code, check the totals, **Save draft**.
- On a quotation: **Send to customer**, **Mark accepted**, **Convert to sale order**.
- On an order: **Confirm**, **Fulfil order**, **Generate invoice**.

Invoice

- **Issue invoice** makes it official. **Record payment** (part payments are fine).
- Wrong invoice? Draft: edit or delete. Issued: **Void invoice**, or **Cancel & credit invoice** if payments exist.

Customers

- **Customers > Collections** shows who owes and for how long; tick customers and **Send reminder**.
- **Customer statement** for any customer and period.

Prices

- Customers in a **customer group** get the group's **price list** automatically. A price you type by hand is never replaced.

> **Need more?** See the matching chapter of the User Manual, or ask your administrator.

Accountant

Keep the books right, close the period.

Daily and weekly

- **Customers > Collections** and **Purchases > Payables Aging**: chase and pay on time.
- Approve **Expenses** (Expenses > Expenses > tick, **Approve selected**); check **Overview** for bills overdue or due soon.
- Record **supplier payments** with the oldest-first suggestion.

Month end

- Review the **Trial Balance**, **Income Statement**, **Balance Sheet**, **Cash Flow**; run the **Tax Report**.
- **Accounting > Controls > Bank reconciliation**: enter the statement date and balance, tick matching lines until the difference is zero.
- Post depreciation (**Assets > Run depreciation**) and any manual **journal entries** (debits = credits).
- **Close the books** up to the month end (admin).

Rules to remember

- Do not edit posted entries; reverse or void the source document.
- Freight on a purchase goes in the receipt's **Landed cost**, not in a separate expense.
- Gift card money is owed (liability) until the card is spent.

Payroll

- Run payroll monthly, **Approve and post**, pay by the bank file, record tax and social-security payments. Rates are a starting point: confirm with your accountant.

> **Need more?** See the matching chapter of the User Manual, or ask your administrator.

Store keeper

Know what you have and where it is.

Receiving

- **Purchases > Purchase orders**, open the order, **Record a receipt**: quantities now, batch/lot or serial numbers, **Landed cost**. Print the GRN.
- Goods land in the warehouse's **Receiving** location. Move them to a **Sales** location with a **Stock transfer**.

Corrections

- **Stock adjustments > New**: product, quantity change (+/-), reason. It stays *logged* until an approver presses **Confirm**.
- **Stock counts**: **Start a stock count**, print the sheet, enter counted quantities, **Submit for approval**.

Reorder

- **Inventory > Reorder** lists what is at or below its reorder level. **Create requisition** to turn it into a purchase request.

Moving stock

- **Stock transfers > New**: product, from and to locations, quantity. Between branches, the receiver presses **Receive** and records any shortage.

Look it up

- Product page > **Stock movement history**. Reports: Stock On Hand & Valuation, Expiring Stock, Dead Stock.

> **Need more?** See the matching chapter of the User Manual, or ask your administrator.

Purchasing officer

Order, track and pay suppliers.

Order

- **Purchase requisitions** to ask, **Purchase orders > New** to buy: supplier, expected date, receive-into warehouse, lines with unit cost.
- **Send to supplier** by e-mail or **Print**.

Receive and bill

- Partial deliveries are fine. When fully received a **Bill** is generated. **Issue bill**, then **Record payment**.
- Wrong goods? **Process a return** on the order.

Pay

- **Suppliers > Record payment**: amount, then **Suggest oldest-first** to allocate. Print the receipt.

Prices

- **Supplier prices** keep agreed costs with validity dates.

Reports

- Outstanding Payables, Payables Aging, Purchases by Supplier or Product.

> **Need more?** See the matching chapter of the User Manual, or ask your administrator.

Restaurant waiter

Take orders, send to kitchen, bill the table.

Open a table

- Floor plan > tap a free table > enter **Guests** > **Open order**. Note **allergies**.

Order

- Tap menu items; choose options; add a **note for the kitchen**; set **Seat** and **Course**.
- **Send to kitchen**. Later courses wait *on hold* until you **Fire course**.

Changes

- After an item is sent, removing it needs a **manager** and a reason (**Void it**). **Give free** needs a reason.
- **Move table**, **Merge into**, **Split / move items** for guests who pay separately.

Bill and pay

- **Bill** prints the pre-bill. **Checkout**: add payments (split equally, by item or by shares), choose the **tip**, or **Charge to room** for hotel guests. Give back the change shown.

> **Need more?** See the matching chapter of the User Manual, or ask your administrator.

Kitchen and bar

Prepare, mark ready, remake.

Kitchen display

- Tickets move **waiting, cooking, ready**. **Start preparing**, **Mark ready**, **Mark served**, **Bump all** for an order.
- Tickets turn amber then red as time runs out. **ALLERGY** warnings show in red.
- **Remake** records a remade dish (counted in wastage reports).

Sold out

- Press **Sold out (86)**, search the item, add a reason. It disappears from the waiters' menu until switched back.

Expo

- The pass: check an order is complete, **Mark everything ready** or **Serve**.

> **Need more?** See the matching chapter of the User Manual, or ask your administrator.

Hotel front desk

Book, check in, bill, check out.

Start of day

- **Hotel > Front desk**: arrivals, in-house, departures, rooms to clean, out of order.

Booking

- **New booking** or **Walk-in**: choose or add the guest, arrival and departure, room type and room, rate plan, source, deposit.

Check in

- Open the booking > **Check in** > confirm the room (the room should be clean). Print the **Registration card**.

During the stay

- **+ Charge** for extras. **Move room**, **Change departure**.
- **+ Split bill / bill a company** when someone else pays part.

Check out

- Open the booking > **Check out**, take payment, **Print invoice**.

Remember

- VIP and blacklist flags show on the guest. Cancellation, no-show and late check-out fees follow the hotel policy; the desk may waive.

> **Need more?** See the matching chapter of the User Manual, or ask your administrator.

HR officer

People, leave, attendance and pay.

New employee

- **Employees > New employee**; give a **login** so they can use My HR; set **Track attendance for pay** only for staff who clock in.
- **Contracts > New**: salary and allowances, then **activate** when signed.

Every month

- Approve **Leave** requests; correct **Attendance**; enter **Adjustments** (bonus, fine) and loans.
- **Payroll > Run payroll for a month**, review, **Approve and post**, download the **bank transfer file**, **Mark salaries as paid**, e-mail payslips.
- **Record payments** of tax and social security by their due date.

When someone leaves

- Employee page > **Employee left**; open **Final pay**.

Remember

- Check tax bands and contribution rates with your accountant. Salary reports are restricted to payroll access.

> **Need more?** See the matching chapter of the User Manual, or ask your administrator.

Booking and reception

Appointments and walk-ins.

Make a booking

- Booking > **New appointment**: service, date, preferred person, a free time, who it is for. If a deposit is needed an invoice holds the time; tick **Confirm now** to skip.

The day

- **Calendar** by person or room; **Print day sheet**.
- On the visit: **Mark done** or **No-show**. **Move to another time** or **Cancel appointment** (unpaid invoice is voided).

Reminders

- **Send reminder now** or **Download calendar file**. Automatic reminders go out before the visit.

> **Need more?** See the matching chapter of the User Manual, or ask your administrator.

Help desk agent

Answer fast, keep deadlines.

Start

- **Help Desk > Overview**: unanswered, overdue, due soon, mine. Open **Needs attention** first.

Work a ticket

- **Reply to the customer** (e-mailed) or add an **Internal note**; **Insert a saved reply** for common answers.
- Waiting on the customer? **Wait for customer** pauses the deadline clock.
- **Resolve** with notes; **Close**; **Reopen** if needed.

Housekeeping

- **Merge into another ticket** for duplicates. Link an **Invoice** or **Job**. Add **Tags**. Only tick **Customer can see** on files you want shared.

> **Need more?** See the matching chapter of the User Manual, or ask your administrator.

Every employee (My HR and My time)

Self-service.

My HR

- **Clock in** and **Clock out**. **Request leave** (type, dates, half days). See payslips once payroll is approved, your leave balance and documents. Update your phone, e-mail, address and emergency contact.

My time

- Start the **timer** or add time by hand (type 1:30, 1.5, 90m or 2h). At the end of the week press **Submit for approval**. Fix anything **Sent back**.

My profile

- Change your password and your **PIN** (4 to 6 digits). Keep both private.

> **Need more?** See the matching chapter of the User Manual, or ask your administrator.

Administrator

Set up, secure, back up.

First day

- Change the **admin password** and the JWT secret; set **Business details**, **System settings**, **Taxes**, **Payment methods**.
- **Settings > Modules**: copy the installation id, install the licence, activate only needed modules.

People

- **Staff > Roles** for access areas (None / View / Manage). On each person: role, extra approval permissions, branch access, **PIN**.

Every week

- Check the **backup** exists and download one off the server. Review the **Sign-in log** and **Audit Log**. Look at **Server logs** if anything failed.

Before an upgrade

- **Backup now**, download it, then follow the release notes.

Remember

- Module activation is permanent. Restoring a backup replaces everything and needs a restart.

> **Need more?** See the matching chapter of the User Manual, or ask your administrator.

Online shop staff

Answer orders, keep the shop fresh.

Every day

- **Online Store > Online orders**, tab **New**: **Accept** (holds the stock) or **Reject** (give a reason). Then **Mark packed**, **Out for delivery** or **Ready for pick-up**, and **Complete** when the goods are handed over (tick **Cash collected** for cash).
- **Refunds due**: open the order and press **Refund through the provider**, or refund by hand and enter the reference.
- **Online payments**: look at *Under review* and *Stuck pending*.
- **Online Store > Sales reports**: sales by day, orders with invoices, payment methods, orders not counted as sales, coupons and best-selling products. A sale counts on the day the order was **completed**.

When asked

- **Returns**: **Approve** or **Refuse**; when the goods are back press **Goods received: put back and refund**.
- **Reviews**: **Approve** or **Hide** the new ones.

Keep the shop fresh

- **Shop settings > Products on the shop**: titles, online prices, and the ticks **Featured**, **Best seller**, **Offer**, **New** for the rows of the first page.
- **Front page**: announcement, banner text and up to 8 banner pictures, footer links.
- **Coupons** for a promotion; **Newsletter** to see the subscribers; **Send a newsletter** to write, test and send one (a test to yourself first; **Stop sending** works while it goes out).

"It says Sold out"

- Under the product: *sellable warehouse stock − reserved − buffer = sellable now*. Lower the buffer, move stock to a sales location, or complete the orders that hold it.

> **Need more?** See *Online Store* in the User Manual, or ask your administrator.
